Re: Public Health School Immunization Clinics

Dear Parent/Guardian:

As children get older, the protection from infant immunizations can wear off. Children can also be at risk of new diseases as they enter their pre-teen and teen years. Additional vaccines are required to keep your child healthy.

Horizon Public Health will be offering vaccinations to all Grade 9 students as part of the routine school immunization program.

- For students in **Grade 9**, we will be offering protection against [meningitis](#).

To submit your child's consent form electronically and to review the vaccine information sheet, please visit the following link:

- English online form: [Consent for Immunizations](#)
- French online form: [Consentement aux immunisations](#)

Should you require a paper copy of the consent and vaccine information, please inform your school. Please ensure your consent/refusal form is submitted by the date of the school immunization clinic.

If you have any questions, please contact Public Health at LVImmu@gnb.ca.

Sincerely,

Fredericton & Woodstock Public Health
